-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 27 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. This communication is responsive to your preliminary amendment filed 7/27/06. Claims 7-26 are currently pending in this application. Claims 1-6 have been cancelled.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7-13 rejected under 35 U.S.C. 102(b) as being anticipated by Woods et al. P.N. 5,369,387 (Woods). Woods discloses a vacuum housing for a magnetic resonance imaging apparatus. Applicant's attention is directed to Fig. 2 and corresponding description. The vacuum housing comprises:

a recess configured to receive lead wires (42,43) for leading the lead wires to elements inside the vacuum housing; and a first lead-through module comprising:

a first cover plate (53) which is configured to seal the recess in a vacuum-tight manner together with at least a second cover plate (19), and

a first structural component (36) connected with the first cover plate (53), the first structural component being configured to be led at least partially through the

recess during assembly of the lead-through module, wherein the first structural component has dimensions that define the minimum size of the recess required for assembly and wherein the recess has a minimum size greater than that of the first cover plate.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 14-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. The structural limitations defined by independent claims 14 and 20 are unclear with respect to the recitation of the "second cover plate". The first lead-through module is described as having a second cover plate, the second lead-through module is also described as having a second cover plate. It cannot be ascertained from anything in the claim language if the two recited "cover plates" are one and the same or two distinct cover plates. Note that the description of the second lead-through module implies the existence of a first cover plate. Applicant is urged to rewrite the claims at issue to resolve this ambiguity in the claims language.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 2859

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woods '634, Laskaris, Takamori, Chen et al., and Kawaguchi all disclose vacuum housing structures for MR magnets. Note the abstract and drawings of each of these documents.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis M. Arana whose telephone number is (571) 272-2236. The examiner can normally be reached on M-Thurs. Fridays Off.
